

TR-101RX

- Correcting Agent Of Dyeing Troubles Like Dyestuff Spots

In occurrence of various dyeing troubles like dyestuff spot, the dyeing industry have undergone a burdensomeness that they had to do W/R and O/R processing again after removing a W/R agent and redyeing. **TR-101RX** is a correcting agent of dyeing troubles, which makes levelling dyeing without removing fluorocarbon-based water and oil repellent and damaging the processed state when various dyeing troubles were caused after W/R processing.

◆ SPECIFICATION	
* APPEARANCE	Light Yellowish Liquid
* IONIC NATURE	Weak Anionic
* pH (1% aq. Sol'n)	7.0 ± 1.0
* SP.GR(at 25°C)	1.05 ± 0.05
* SOLUBILITY	Easily soluble in cold water.
* STORAGE STABILITY	Min. 1 year under cool and dry conditions when stored in original sealed, packaging.
* COMPATABILITY	Compatible with anionic and nonionic materials.
◆ FEATURES	1) TR-101RX displays good levelling effect on correcting the dyeing inferiority caused after W/R processing regardless of kinds of dyestuffs and fibers. 2) TR-101RX can improve productivity, because it can easily correct the dyeing inferiority. 3) TR-101RX doesn't adversely affect W/R and O/R efficiency. 4) TR-101RX can cut down the cost. 5) TR-101RX has good storage stability. 6) It is environmental-friendly product as APEO-free and NPEO-free.
◆ APPLICATION FIBERS	Suitable for all fibers such as Nylon, Polyester, Cotton, T/C, N/C, N/P, etc.
◆ HOW TO USE	Recommended use levels are 1-2g/l according to kinds, density, thickness and types of fibers.

TR-101RX

- Correcting Agent Of Dyeing Troubles Like Dyestuff Spots

◆CORRECTING DIAGRAM & RECOMMENDED RECIPE

- When dyestuff spots is occurred in testing process after Water/Oil Repellent processing, it can be corrected easily by following process without water-repellent removing.

1) The correction method at normal pressure(Jigger)

- **TR-101RX** : 1-2g/l
- Correction conditions : Levelling for 4-6 cycles at 60-70°C
- Washing : Washing warm at 40-50°C and then cold.
- Dry : 50-60 m/min at 170-180°C
- Bath ratio : 1:4-1:5
- **Notice : TR-101RX residues after correction processing may impair W/R and O/R efficiency. Please thoroughly rinse.**

2) The correction method at high pressure(Rapid)

- **TR-101RX** : 1-2g/l
- Correction conditions : Levelling for 40-60 min at 60-70°C.
- Washing : Washing warm at 40-50°C and then cold.
- Dry : 50-60m/min at 170-180°C
- Bath ratio : 1:20-1:50
- **Notice : TR-101RX residues after correction processing may impair W/R and O/R efficiency. Please thoroughly rinse.**

◆ PACKAGE

120 Kgs NET IN DRUMS.
