

ROCOLUB MSS (Levelling Agent)

Levelling Agent for Reactive Rapid Dyeing

Characteristic : Blend of aromatic sulphonated products.

Appearance : Dark Brown Liquid.

Ionic State : Anionic

Properties :

- ☐ During reactive dyeing process, dye and salt dosing intervals are longest time consuming periods, otherwise, unlevelling prevails, frequently.
- ☐ Due to high energy and labor costs and environmental pollution concern of people, focused on, time, hence energy saving compounds, since two years.
- ☐ **ROCOLUB MSS (Levelling Agent)** is the member of WEL series (water - energy - less) which enables the dyer to inject salt at the beginning, and dose dye in short time and in 10 minutes running intervals, which saves two hours, totally.

pH(25 °C) : 5.5 – 7.0

Application :

☐ Rocolub MSS (Levelling Agent) is supplied in to the dye bath at the commence, with salt together.

Dye **ROCOLUB MSS (Levelling Agent)**

Dosing 0.5 – 0.6 g/l

Storage : 1 Year.
