

TECHNICAL DATA SHEET

Rocosalt SRD (Salt Reducer)

The Salt Reducer (Rocosalt SRD) is a special Salt Reducing chemical for dyeing processes of cotton at 60-80°C. It is a mild and gentle chemical for supporting the dyeing process to reduce salt amount, ensuring good penetrability and dye ability.

Appearance	: Crystalline
Color	: Transparent
Solubility	: Easily dilute able with water.
Iconic Character	: Mixture of addition complexing agent and polymers.
Stability	: Resistant of acids, alkalis and electrolytes in usual concentrations and to hard water.
Usage:	: 0.30 - 0.40 g/l

Existing Glauber salt	After Reducing the Glauber Salt	
	Glauber Salt Need	Salt Reducer Need
g/l	g/l	g/l
80	60	0.40
70	52	0.38
60	45	0.36
50	38	0.32

Advantage

- Reduced 20%- 30% salt from existing recipe
- Save storage Area.
- Save excess job work.

STORAGE: Must be stored at room temperature, and can be used min 18 months if stored in room temperature at original package.
